IMPORTANT NOTE

About Arithmetic

Flash Cards:

THE NUMBER IN THE CORNER OF EACH CARD IS ALWAYS THE ANSWER TO THE PROBLEM ON THE OTHER SIDE OF THE CARD. THIS ENABLES THE PARENT TO SEE THE CORRECT ANSWER WITHOUT TURNING EACH CARD OVER.

Form 33 - AD

How ARITHMETIC Flash Cards Can Help Your Child

INTRODUCTION:

A good time to start using these Flash Cards is when your child is introduced to this phase of Arithmetic in school. Each day at home he can pick out the problems which he has seen in school. At this point, you can help him form a solid foundation in Arithmetic by regularly following the procedure described in the "Flash Method."

SUPPLEMENT:

Throughout the year, as your child progresses, you can supplement his regular classroom work through the continued use of Fairchild Arithmetic Flash Cards in the home.

REVIEW:

If, for some reason, your child has not developed a sound understanding of this branch of Arithmetic, it is not too late to help him overcome his difficulty. Flash Cards are a good remedy for children with problems in Arithmetic. Carefully go over the cards with your child and have him show you which problems are not clear to him. Teach him the correct way of doing the problem and then REVIEW the whole deck. If he consistently misses the same problems, go over them, and explain them to him again. Be very patient and remember that all children learn at different speeds. Continue using the "Flash Method" until you are sure that your child has mastered all the problems.

HOW TO USE FLASH CARDS

Flash cards are visual aids that have been used by teachers for many years. They are used primarily for teaching children arithmetic, the alphabet and words.

Fairchild Flash Cards are complete with 100 basic arithmetic problems. These cards are an excellent aid to parents who wish to give their child extra help in arithmetic. Their handy size, makes Fairchild Flash Cards ideal for use by all members of the family.

THE "FLASH METHOD"

1. Have your child pick out the cards to which he knows the answers. Make a deck of them, shuffle it so that cards are not in numerical order. Show him the first card.
2. Ask the child to call out each answer as soon as he sees each card. For every correct answer, he receives that card as a "reward." If he answers incorrectly, lay the card to one side and continue with the rest of the cards, following the same procedure.
3. After you have gone through the deck, help your child with those he answered incorrectly. When he feels he knows the right answers, go through them again, until you are sure he has mastered each problem. Following the same procedure, add new problems when you feel he is ready for them. Be sure to adjust to the child's own speed in learning. Do not force him. Make it FUN.
